## Changes during pilot/beta (3.00.000)

The pilot/Beta version was released for customer test 20. Nov 2020. This section describes changes made from this first version.

### Version 3.00.001 Release

**date:** 26. Nov 2020

#### Changes:

- Fixed problem with special characters in password causing login impossible.
- Fixed problem with webserver only supporting port 80. If different port is configured, the Manual Connect feature fails.

### Version 3.00.002: Release

**date:** 7. Dec 2020

#### Fixes from version 2.x:

- Fixed rare but critical bug where Connection Suite is not able to parse message received.

#### Changes from version 3.00.001:

- Added link to installer for Antivirus.
- Added backup/restore of IMAP.
- Added configuration of IMAP folder shares.
- Improvements in Manual Connect feedback
- Added connection log details after manual connect.
- Access rights reviewed all-around.
- Improved authentication of APIs used.
- Fixed bugs in quota management (buy-up limitations)
- Fixed bug in startpack backup routine, creating too many backups.

### Version 3.00.003:

**Release date:** 22. Jan 2021

#### **Changes from version 3.00.002:**

- Fixed issues related to manual connections.
- Fixed issue that caused replications to fail, which sets Connection Suite in a state where it looks like it has crashed.
- Fixed issue related to the deletion of historic messages.
- Fixed bug with user credentials on API and Service manager that causes manual connections to stop working.
- Fixed bug in WebMail where the address book is missing when composing a new message.
- Fixed bug in UI that prevented the existing hire from being extended.
- Fixed bug in UI with an improved error message when a hire approval could not be initiated.
- Fixed bug in UI where the last day of months was missing under transaction history - Cosmetic Improvements.
- Fixed bug in UI where connection log could not be open after the error message "Unable to communicate with the comm. Equipment."

### Version 3.01:

**Release date:** 12. May 2021

#### **Changes from version 3.00.003:**

- Updated RoundCube in Webmail to version 1.4.11
- Modified the IMAP server service for performance optimization in SQL
- Added an option to allow or prevent modifications to folder structures.
- Fixed an issue with Dialog Scheduler, where it does not initiate IMAP backup at scheduled time.
- Fixed an issue with Instant Vessel Kit, where the Oracle password is not updated on both the x64 registry and Oracle database.
- Fixed an issue with reset password trigger to support Oracle 10G.
