

# Release notes Connection Suite 3.0

Version: 3.0

Early access: 5. Nov 2020

Release date: 1. Dec 2020

## New features

### **New Ship UI.**

We completely revamped the user interface, which now features an entirely flash-free, customised workspace for administrators and crew users.

- New design giving improved user experience
- Improved password reset mechanism
- Night mode option
- Differentiates between admin/officer view and crew view

## Improvements and bug fixes

### **Updated webmail client**

The webmail client is updated to latest version of Roundcube. Features three column view and responsive and multi-device support.

### **Fix in Network Control**

Updates in Dualog® Network let you modify timeout values for failover to reduce traffic overhead.

## Security improvements

The update also brings along a wide range of security improvements. Individual accounts ensure complete audit capability. Weaknesses in the code framework have been patched to mitigate security issues. The database is also updated to eliminate vulnerabilities and improve performance.

- Php upgraded to version (7.4.10)
- Apache reconfigured to improve security
- Removed security issues in php code
- Removed type-in functionality on login page
- Removed general admin account
